

As we plan Camp Rock for the summer of 2021, we know there will be questions, specifically, around camper and counselor health and safety. The safety of all those involved with camp is our top priority. As we plan camp for this summer, we will continue to monitor COVID-19 and its impact on camp throughout the year and especially as we get closer to the time of camp. Please know that we will be monitoring North Carolina State guidelines, American Camping Association and CDC recommendations and working with The Blue Ridge Assembly to be aware of the safety and cleaning protocols that need will need to implemented and planed for so we know what we need to do in addition. We remain committed to providing the camp experience you have come to expect.

Please note that these guidelines are subject to change as we monitor recommendations throughout the year.

1. We will abide by the policies of state and local authorities and The Blue Ridge Assembly.
2. Train our staff, counselors and all volunteers on necessary preventative health and safety protocols, as well as plan for handling symptoms and exposure identified at camp.
3. Perform daily health screenings on staff members, leadership staff, counselors and campers; requiring anyone not feeling well to seek medical attention and be quarantined, if becoming ill.
4. Provide necessary supplies for common/shared spaces including but not limited to hand sanitizer, disinfectant wipes, disinfectant cleaner, extra face masks, etc.
5. Make adjustments to our scheduled programming in an effort to ensure a safe and healthy camp environment. We will program our large group times to be outside as long as the weather allows, meal times will be family style and tables spread out as much as space allows, and other activities will be planned for social distancing and without contact.

All campers, counselors, work crew and staff are asked to abide by the following guidelines:

1. Complete a health screening of temperature checks and symptoms for 7 days prior to camp and upon arriving at camp. We will have daily symptom screenings while at camp.
2. Whenever possible, maintain social distancing (at least 6 ft.) from other individuals. Campers and counselors will be placed in smaller family groups. These groups will sleep on the same hall, eat together and do all activities together.
3. We will require everyone to wear a face covering over your nose and mouth while inside buildings, except for living space. Each camper is responsible for bringing their own face mask to camp. Face masks are not required while outside.
4. Be respectful and intentional about protecting your own health and that of others.
5. Practice enhanced hygiene practices such as regular hand washing and use of hand sanitizer.
6. Comply with staff instructions and requests related to the expectations above.
